San Ramon Residents: Household Hazardous Waste Door-to-Door Collection Services!

PROGRAM BEGINS MAY 3, 2021

Properly Dispose of Your Household Hazardous Waste (HHW)!

The City of San Ramon has partnered with Clean Harbors to create a convenient door-to-door HHW collection program for residents.

MAKE AN APPOINTMENT AND HAVE YOUR HOUSEHOLD HAZARDOUS WASTE COLLECTED FROM YOUR DOORSTEP!

CALL: 1 (800) 433-5060

WEBSITE: https://cleanharbors.formstack.com/forms/san_ramon_door_to_door_program

After you make an appointment (see above), you will be sent a containment/collection kit. The kit includes an instruction sheet, heavy gauge plastic containment/collection bag (**only the provided bag can be used-no other bags accepted**), tie for bag, and labels for unmarked or unreadable containers.

PLEASE NOTE: MAXIMUM SIZE CONTAINER IS 5 GALLONS.

CONTAINMENT/COLLECTION TIPS AND INSTRUCTIONS:

• The bag needs to be ready for pick up **by 6:00am on your appointment day**. Place the bag in an area visible to the driver, but **not at the curb**. **The top of your driveway and close to the house is a perfect location.**

PRO TIP: Place the empty bag at your chosen collection location. Bring each item you want to dispose of to the bag and place inside. **This will help keep the bag free from any potential rips or perforations.**

• Use the bag tie (included) to completely close the bag. **Open bags or partially closed bags will not be collected.**

HOW TO PROPERLY PLACE ITEMS INSIDE THE BAG:

• **Only one type of item is allowed per bag.** (Example: do not mix toxic cleaners with gasoline, etc.) Please request additional bags for additional types of HHW waste disposal. Review the sample list of acceptable materials on the other side.

• Verify that each item is identifiable or use the labels in the kit to clearly identify the item.

PRO TIP: Keep the item in its original container whenever possible (*label if needed*). **Items that are not identified will not be collected.**

• Make sure the container is completely sealed and not leaking. If needed, you can reinforce the container with duct tape or put a leaking container in a sealed zipper style bag. **If an item spills onto other items, dangerous chemical reactions can occur, and the driver cannot collect the item(s).**

PRO TIP: Use a box or bag inside the large containment bag to keep items vertical and to avoid a spill.

SAFETY FIRST! IF A SPILL OCCURS:

• If your waste spills, remove it (*if you can*), place in a new container, and secure in a zipper-style bag. Safely remove as much spillage from the large containment/collection bag as possible, place in a separate zipper-style bag, and label what material is in the bag.

• Call customer service at 1 (800) 433-5060 for an additional bag and a new appointment. When your new bag arrives, place the contained old bag it in with the other properly sealed HHW items for collection.

Please see other side for more information.
