

PAVEMENT MANAGEMENT 2023 PROJECT AND CITYWIDE NETWORK IMPROVEMENTS & ENHANCEMENTS - UPDATE

PLANNED DATES for SLURRY SEAL: Spring 2024

As part of our ongoing efforts to maintain and improve our community's infrastructure, we would like to inform you that slurry seal resurfacing work will resume. The contractor, DRYCO Construction, Inc., for the Pavement Management 2023 Project and Citywide Network Improvements & Enhancements will commence work on April 29, 2024. The project had been temporarily suspended due to weather conditions. Typically, weather in the winter months is not conducive to slurry seal pavement treatment. With more favorable weather coming, the work can now be re-started. The contractor plans to continue slurry seal work in Spring of 2024.

Streets which have received slurry seal and cape seal treatments will be completed with striping, markings, and markers.

Residents will be notified two (2) weeks prior to the Contractor continuing with slurry seal pavement treatments.

We understand construction tends to be a disruptive event but often necessary for the improvement and safety of our infrastructure. We appreciate your understanding and cooperation as we work to enhance our community during this essential part of construction.

Area maps showing the planned slurry seal street sections and parking lots along with a list of streets can be found on the City of San Ramon's website at:

<https://www.sanramon.ca.gov/cms/One.aspx?portalId=10826130&pageId=11705675>.

Project Description: The work to be done includes the removal and replacement of pavement markings; slurry seal pavement treatment slurry seal. Additional notifications will be sent at the following intervals:

- 1) two (2) weeks prior to paving
- 2) three (3) days prior to paving
